REPORT OF THE SECRETARY OF STATE.

STATE OF FLORIDA,
OFFICE SECRETARY OF STATE.
Tallahassee, Florida, December 31, 1906.

HON. N. B. BROWARD,
Governor of Florida.

Dear Sir:—In compliance with the requirements of law, I have the honor to submit herewith my report of the transactions of the State Department of Florida, for the years 1905 and 1906:

During the past two years I have collected and paid into the State Treasury the sum of fifty eight thousand one hundred and fifty-one and seventy-five one-hundredths dollars, ($58,151.75) as follows: Charter Tax Fees, $55,-312.00; Automobile Tax Fees, $610.00; Chaffeurs License Tax, $168.00; Certificates under Seal of State, $68.00; General Statutes and Session Laws, $1,993.75. The charter tax above shows a remarkable increase over the two preceding years, being $32,506.00 for the years 1903 and 1904, an increase of more than 70 per cent.

Under the provisions of Section 2218, of the Revised Statutes of the United States, all the records and archives of the United States Surveyor General's office, when discontinued, are to be turned over to the Secretary of State, or to some other officer duly appointed for the purpose, and under further provisions of Section 2221, of the Revised Statutes of the United States, it is required that such records shall, in no case, be turned over to the authorities of the State until the State shall provide by law for their reception and safe keeping.

The President of the United States, by executive order issued on April 27, 1906, abolished the office of the Surveyor General of Florida, to take effect on June 30, 1906, and designated the Secretary of State as the official custodian of the records of the said office. Under the provisions of the above mentioned Statutes, it was impossible for me to comply with this requirement for the reason that there is no available space in the Capitol for storing and preserving the said records, and by joint communication, signed by the Governor and members of the Cabinet, we requested that the order be suspended until the convening

of the next Legislature of this State, when proper provision would be made by the Legislature for storing and keeping the said records, and in accordance with that request the President did, on June 14, 1906, issue an order modifying his previous order for the abolishment of the said office by making the previous order effective on June 30, 1907.

Sections 84 and 85, General Statutes of Florida, designate the Secretary of State as ex-officio State Librarian, with certain enumerated duties to perform, to classify, shelve and catalogue the books of the State Library, which has not been done for the reason that no provision has been made by the Legislature for a library room, book cases or shelving. I have utilized all available space in the basement for shelves, but it is impossible to use the books so shelved in the basement for the reason there is no light, no facilities for cataloguing and indexing, nor sufficient room to properly classify them. I have provided the best place within my power for these books, and there are, yet, many volumes piled on the floor in the rooms in the basement. I receive each year many volumes from the States and Territories and from the Departments at Washington, books of value, which should be preserved, and if it is the intention of the Legislature that the statute above referred to be carried out, it is their duty to provide a suitable place for a library, and appropriate sufficient funds for the employment of clerical assistance in the work of cataloguing the books, and for a permanent assistant librarian.

In addition to the books enumerated above I have on hand the entire edition, except what has been sold in the past few months of the new General Statutes. These books are worth, in round number, about $20,000.00, possibly more. I have space for storing about 1,000 or these books and the balance, consisting of nearly four thousand books, worth $3.50 to $5.00 each, are stored in the damp basement in the original packing boxes, subject to being ruined by damp, or injury in various other ways. We had several hundred dollars worth of the old Revised Statutes destroyed by damp in this same way, being stored in boxes in the basement. There is at present absolutely no help for this. I have some of the more valuable law

books stored in my vault which is for the preservation of the records of the office and is not large enough for that purpose alone, and to put law books in there keeps me crowded so that the records are not accessible.

As custodian of the Capitol Building and grounds, I respectfully recommend an appropriation for contingent expenses, as shown by my estimate filed with the Comptroller. I would also respectfully recommend an appropriation sufficient to provide for the completion of the tiled floor from the Executive office to the Supreme Court, including the west porch, a cement floor throughout the basement, repainting the building, and a substantial and suitable staircase up into the dome.

Very respectfully,

H. CLAY CRAWFORD,

Secretary of State.

APPENDIX

EXTRACTS FROM THE

THIRD CENSUS OF FLORIDA

TAKEN IN 1905.

POPULATION OF FLORIDA

CENSUS OF 1905.

Florida was organized as a territory March 30th, 1822, and admitted into the Union as a State March 3rd, 1845.

Table No. 1 gives the population of Florida at each census from 1830 to 1900, as taken by the U. S., and the census for the intervening periods between 1885 and 1905, inclusive, as taken by the State, together with the increase in number and percentage of increase. The population of the State in 1905 was 614,845, as against a population of 528,542, as shown by the census of the United States for 1900, showing an increase in five years of 86,845, or 16.4 per cent.

Table No. 3 shows the area in square miles of the land surface of the State and the population by counties for 1905 and 1900, compared. The average number of persons per square mile is 11.3, as compared with 9.7 in 1900.

Table No. 4 shows the increase in number and per cent.; nine counties show a small decrease in population; this decrease with one or two exceptions is confined to the agricultural section of the State and represents almost entirely a shifting of the negro population from the farms to the turpentine camps and mills, and to the truck and fruit growing sections of the State, where better wages are paid for labor than can be afforded by the general farmers.

Table No. 10 shows population of voting age by race by minor civil divisions for 1905.

Table No. 14 shows population, male and female, by race, 1905.

Table No. 15 shows number of native and foreign born population, race, 1905.

Table No. 19 shows the number of persons 100 years old.

Table No. 24 shows the population of the incorporated cities and towns in alphabetical order, 1905.

TABLE NO. 1—POPULATION OF FLORIDA, 1905 TO 1830.
